3. One of the most magnificent touristic sights in the Black Sea region of Turkey is the Sumela Monastery. The white walls of the monastery stand out sharply from the one thousand-foot cliff out of which it was carved. It is a seven-storey complex that was carved into the walls of the cliff. Monks had lived in the caves of this cliff for hundreds of years before it reached its final form. It was abandoned in 1923 and left to waste for decades.

The monks ____.

- A) used to hide in its 7 floors
- B) lived in its caves
- C) preferred the cliffs
- D) did not want to climb the cliffs
- E) used it as a place of worship

4. After finishing school, they got jobs working together at a medical school hospital which their university had been affiliated with. The four years of intense training they had obtained made them suitable for positions not often given to new graduates. After a short in-service programme, they were assigned to their wards and began working with patients who had undergone major surgery. The new group of nurses proved to be excellent professionals. At the same time, they were able to maintain the close bonds of friendship that had developed between them before graduation.

The new nurses were trained ____.

- A) in the hospital before they began to work
 - B) for four years in an intensive university programme
 - C) for major surgery
 - D) to be professionals and to maintain their bonds
 - E) by the medical school
5. After finishing school, they got jobs working together at a medical school hospital which their university had been affiliated with. The four years of intense training they had obtained made them suitable for positions not often given to new graduates. After a short in-service programme, they were assigned to their wards and began working with patients who had undergone major surgery. The new group of nurses proved to be excellent professionals. At the same time, they were able to maintain the close bonds of friendship that had developed between them before graduation.

Their training ____.

- A) was better than that of other students
- B) taught them to care about each other
- C) took place in an affiliated school
- D) was in their service position
- E) was not usually given to new graduates

Reading Comprehension Multiple Choice Questions Exercise 9

6. After finishing school, they got jobs working together at a medical school hospital which their university had been affiliated with. The four years of intense training they had obtained made them suitable for positions not often given to new graduates. After a short in-service programme, they were assigned to their wards and began working with patients who had undergone major surgery. The new group of nurses proved to be excellent professionals. At the same time, they were able to maintain the close bonds of friendship that had developed between them before graduation.

The best TITLE for this passage is ____.

- A) Training of Nurses
B) Graduation and the Nurse
C) What They Did After School
D) The New Professionals
E) A Job in the Hospital
7. Algae are a group of plants that contain some of the largest and smallest life forms known. Most Algae are made of one cell and can only be seen under the microscope. Other types can grow over forty metres long. An example that is known to most people is brown seaweed. One of the most important groups of algae is plankton. Many sea animals form their diet on this plant and the natural balance of sea life would be greatly disturbed without it.

Algae is ____.

- A) only seen under the microscope
B) has many important uses
C) both one of the largest and smallest forms of life
D) an example of seaweed
E) is eaten by fish in order to maintain a balance in nature

8. Algae are a group of plants that contain some of the largest and smallest life forms known. Most Algae are made of one cell and can only be seen under the microscope. Other types can grow over forty metres long. An example that is known to most people is brown seaweed. One of the most important groups of algae is plankton. Many sea animals form their diet on this plant and the natural balance of sea life would be greatly disturbed without it.

Plankton is ____.

- A) a group of important plants
B) known to most people
C) one of the major diets of fish

E) a form of disturbance to sea life
9. Algae are a group of plants that contain some of the largest and smallest life forms known. Most Algae are made of one cell and can only be seen under the microscope. Other types can grow over forty metres long. An example that is known to most people is brown seaweed. One of the most important groups of algae is plankton. Many sea animals form their diet on this plant and the natural balance of sea life would be greatly disturbed without it.

Without algae, ____.

- A) many plants would not exist
B) a microscope would not be necessary
C) seaweed could have better colouring
D) all fish would starve
E) the balance of nature would be destroyed
10. Styles of cooking have changed a great deal over the last few years. Elaborate sauces and rich desserts are being replaced with simple, low-cost foods. The fast-paced lifestyle of our world today has limited the amount of time people have to prepare meals. Along with this, the astronomical prices of gourmet, five-course meals have made it impractical for most families. Reasons for health also seem to play a major part in the changes in food preference. Fresh, low-cost, locally available ingredients make much more sense for people who wish to maintain their health, vitality and proper weight.

People these days are paying more attention ____.

- A) to their health
B) to how they prepare well meals
C) to how elaborate sauces are made
D) to astronomical gourmets
E) to what families want to eat

Reading Comprehension Multiple Choice Questions Exercise 9

11. Styles of cooking have changed a great deal over the last few years. Elaborate sauces and rich desserts are being replaced with simple, low-cost foods. The fast-paced lifestyle of our world today has limited the amount of time people have to prepare meals. Along with this, the astronomical prices of gourmet, five-course meals have made it impractical for most families. Reasons for health also seem to play a major part in the changes in food preference.
